

International Imaging Materials, Inc. (IIMAK) is an industry expert and a leading North American manufacturer of thermal transfer ribbons, which are used in a wide range of high growth markets including bar coding, thermal fax, color computer graphics and security authentication. IIMAK's global operations have nearly 600 employees worldwide, and are headquartered in Amherst, New York. We currently have an opportunity as a Programmer for the right candidate.

PROGRAMMER

POSITION SUMMARY:

Under supervision, participates in the analysis, development and documentation of systems and programs for processes to be implemented as computer applications. Develop program specifications, computer programs, and supporting documentation. Perform related tasks necessary to the development and implementation of computer processes supporting the work and goals related to work consistent with the job description.

PRINCIPAL RESPONSIBILITIES:

- Under supervision, designs or assists in the design of applications and systems on simple to moderate problems (design includes diagrams indicating operations to be performed in a program or system, as well as specification of necessary inputs to system and procedures to be followed by Information Systems and user personnel)
- Assists in all aspects of project development of systems and programs that require the learning and application of principles and techniques of systems analysis and programming.
- Develops system and program test plans for simple to moderate processes and verifies accuracy and completeness of program and systems tests.
- Tests and refines programs as required to complete the relevant test plans.
- Writes or reviews necessary documentation for systems and programs (documentation includes system and program specifications, operating instructions and procedures, control instructions and procedures, plus user guidelines)
- Assists with implementation of computer programs and required procedures to insure successful use of the installed software
- Provides internal and external support to IT customers on IT supported systems and applications.

QUALIFIED CANDIDATES SHOULD POSSESS:

- Bachelors degree, preferably with a major in Information Science, Mathematics or Computer Science.
- 1+ years of computer programming experience
- Knowledge of PC and LAN hardware and software
- PC application knowledge and experience
- Network knowledge and experience
- Strong interpersonal and communication skills
- Ability to handle multiple tasks and priorities
- Good administrative skills
- Good programming skills in multiple languages
- Ability to maintain cooperative and effective working relationships
