

REPLACE THE RIBBON, KEEP THE QUALITY

THERMAL TRANSFER FACSIMILE RIBBONS

Look no further for the high-quality replacement fax ribbons you need to get the most out of your fax machine with the least amount of hassles. And forget about multiple distributors, too. We carry the entire line of cassette and refill ribbons for all thermal transfer fax machines on the world market. Compare our ribbon features to those of other suppliers, and you'll find that we're the only ones offering everything you're looking for like:

Clear, consistent images, crisp graphics and quality text

Our ribbons are designed to perform to the OEM standard - so you get equal quality and yield to your original ribbon at even greater value.

Full backcoat

Keeps your print quality at a higher level and makes your machine run longer and better. To cut costs, many competitors reduce the amount of protective backcoat they apply to a ribbon's non-ink side. This results in ribbon breakage and poor print quality, and eventually, is damaging to your fax printer. Our ribbons won't compromise quality for value.

Patented, easy-open flap banded packaging

Unique packaging system prevents your ribbon from wrinkling, unwinding or telescoping before you get to use it.

Cassette products rigorously tested for durability under demanding conditions

Sturdy construction assures cassettes can be refilled again and again, so you can get the most out of your fax machine with the least amount of hassles. Our cassettes are uniquely designed to avoid patent infringements.

Color-coded cores to match OEM specifications

Eliminate the guesswork - and prevent incorrect ribbon loading, which can damage your machine.

Loading instructions

Clear multi-lingual instructions include detailed illustrations to make installation easy.

New packaging

Bold new graphics make it easy to identify the ribbon you need.

Backed by a quality guarantee

Made in the USA
