

Drop-on-Demand Inkjet Inks

IIMAK is your source for high-quality inkjet fluids which meet or exceed the OEM standard. Now, you can reduce your replacement ink costs with products engineered to 100% compatibility for valvejet-type printing systems. Aggressive filtration standards deliver superior performance and maximize system uptime. Water-based inks deliver excellent print quality on porous substrates including corrugated and lumber. Solvent DOD inks for non-porous substrates are also available for specialized applications such as steel marking or printing onto plastic.

OEM Equivalent Large Character Inks for: Videojet®/Marsh® | Loveshaw® | Matthews® | Diagraph® | and others

- Significant savings on DOD direct replacement inks in a range of colors for marking on porous surfaces such as corrugated cartons.
- "Pour-over" direct replacement inks save time and eliminate waste as they do not require the system to be flushed before use.
- DOD inks utilize de-ionized water which assures a high level of purity for smooth, reliable system operation.
- Various container sizes available (1 gallon to 250 gallon totes) to accommodate both small and large volume delivery systems for maximum efficiency.
- Developed and manufactured in the USA.
- Fast shipping with most popular items in stock.
- Custom ink formulation for your special application requirements.
- 100% satisfaction guaranteed.

Choose from a variety of direct replacement fluids in OEM equivalent packaging for quality imprints, high speed capability, and excellent adhesion.
